THE HOUSING INDUSTRY: A BIBLIOGRAPHY

Joan Wirth D'Ambrosi, Senior Librarian  
New York State  
Office of Planning Coordination

The housing industry is a fragmented industry and information regarding it is similarly fragmented. It is bound by rising costs, a diminishing labor force, union demands, and restrictive building codes and zoning regulations while facing the unprecedented task of meeting the projected need of 26 million new homes in the next ten years.

This bibliography is offered as a compilation of information relating to the housing industry's organization, markets, problems, and future.
